

## **SYMPHONY LAUNCHES d<sub>2</sub>w OXO-BIODEGRADABLE PLASTIC AT CROPAK, IN THE BALKANS**

The Symphony Group launched its d<sub>2</sub>w oxo-biodegradable plastic products in the Balkans at the CROPAK packaging conference in Opatija, Croatia, on Friday 15 May, attended by packaging professionals from all the Balkan countries and representatives from the Environment Ministry. Symphony was represented by Group Deputy Chairman, Michael Stephen.

In a speech at the Conference, and later to national television reporters, Mr Stephen explained that d<sub>2</sub>w is aimed at plastic waste which escapes into the environment where it would otherwise lie or float around for decades. d<sub>2</sub>w plastic would self-destruct after a short time, leaving no harmful residues.

Considerable interest was shown at the conference in d<sub>2</sub>w products, and especially in the world-first announced by Symphony on 13 May of its technology for making oxo-biodegradable metallised film for packaging.

Symphony has distributors in Ljubljana and Koper, covering the Balkan countries, and is already the designated supplier of degradable plastic for Delta-Maxi, the region's largest supermarket chain.
