

**SYMPHONY ENVIRONMENTAL TECHNOLOGIES PLC JOINS THE
BRITISH PLASTICS FEDERATION**

Symphony Environmental, the specialist in degradable plastics, has become a member of the British Plastics Federation (BPF)

Symphony's Chief Executive, Michael Laurier, commented "by joining the BPF we hope to contribute even more to British industry's overall export effort through our international network. We are already active in 92 countries through 57 Distributors, promoting our innovative British technology in oxo-biodegradable plastics"

He added "Membership of the BPF will also enable us to contribute further to the development of industry standards for products and commercial practices. The platform provided by the BPF is an excellent means of securing industry consensus."

The British Plastics Federation (BPF) has over 400 members and 1200 affiliated members. Established in 1933 they are the most powerful voice in the UK plastic industry and support members across the entire plastics industry supply chain. The BPF help to influence the UK plastics industry strategic direction at all levels. Further, being at the heart of the global plastic community they will provide Symphony with the opportunity to share experiences and resolve industry issues through unified action.

NOTE TO EDITORS:

Symphony is a British company listed on the AIM market of the London Stock Exchange. Symphony's degradable plastic technology is branded d₂w and appears as a droplet logo on many thousands of tonnes of plastic packaging and other plastic products worldwide. Symphony's recently-introduced anti-microbial plastic additives are branded d₂p.

Symphony is a member of the Oxo-biodegradable Plastics Association (www.biodeg.org), the Society for the Chemical Industry (UK), and the American

Standards Organisation (ASTM). Symphony is also a member of the European Organisation for Packaging & the Environment (Euopen), the US Save the Plastic Bag Coalition, and the British Brands Group. Symphony actively participates in the work of the British Standards Institute (BSI), the European Standards Organisation (CEN), and the International Standards Organisation (ISO)
